

[PRODUCT SHEET]

Product: Handset accessories

Carrying, headset and charging options for any work situation

HANDSET ACCESSORIES

The Ascom handset accessories are designed to meet the demands from many work situations. There are different carrying options, headsets, chargers and more.

Carrying options

Choose the carrying option that suits your everyday life. There are several alternatives. Available for extra security are also security strings to be attached to the clip.

Headset options

For convenient handsfree use, attach one of our headsets with the microphone on a boom or integrated in the cable. Protection plugs are available for those times when a headset is not needed.

Charging options

For quick charging, you can choose between a desktop charger for single handsets and a wall mounted charging rack for multiple handsets. Our data sheets will give you more information about each charger.

If you have forgotten to charge your handset, an extra battery pack can come in handy.

On next page you can find some of the accessories available. For more information on each accessory please see our data sheets.
